Paul - Can you address Erik's request for an extension and document in an email to be logged into the file. The bond amount would be based on what was remaining on site, not on how full a truck was loaded or how many truck loads were removed. thx-lah

Thank you for your request. Yes, we can extend the deadline to the end of the year. The bond amount will need to be based on the cost of reclamation, including the degree of disturbance and the amount of equipment remaining at the site. I will print your request and this e mail for the file and make sure this is documented in our database.

Leslie, Paul, and other regulators,

This letter is to inform you that we have begun to remove excess equipment from the small mining operation for Castle Peak. We do plan on taking equipment away until it passes inspection and regulation for the current amount bonded. In a conversation with Leslie Heppler, Ms. Heppler informed us that we could stay bonded and not have to put up further money at this time if we remove two semi loads of material from the site.

We do request additional time to finish hauling off excess material. We propose added time until the end of this year (2015). Please let me know if that proposal is allowed.

Thank you

Erik Wilcken 10-27-2015
